Syllabus for CMSC 406

Spring Term 2025 3:10 TTh Mr. Gregg

Course Description and Objectives

CMSC 406 is a course in web development. We will be covering the basics of HTML and CSS, along with JavaScript programming. We will be using both traditional JavaScript and React as a means of programming web applications.

How this Course is Structured

We will meet three times a week for lectures. I will be assigning programming projects throughout the term.

We will have two midterm exams and a final exam.

Grading Policy

Assignments and exams have the following weights:

Homeworks - 55% Midterm exams - 20% Final exam - 25%

Late policy for assignments is that assignments may be turned in after the initial due date for a 5% penalty for each day the assignment is late. I will waive all or part of the late penalty if you have a valid excuse; however, you must contact me before the initial due date to ask for an extension.

Textbook

Our texts are *Eloquent JavaScript, 3rd Edition* by Marijn Haverbeke and *The Road to Learn React* by Robin Wieruch.

Office Hours

Office hours this term are 2:00-3:00 MWF and 9-11 TTh.

Course Web Site

The course web site is at http://www.lawrence.edu/fast/greggj/cmsc406.html. The web site will feature lecture notes and other supplementary materials.
