

Prime Movers

Our population is too high,
I think we all are going to die.

Our protein sources are too few,
I don't know what we're going to do.

Our land and water are too poor,
What does the future have in store?

Innovation,
Transformations,
Evolution,
New relations.
We have to fight to change ourselves
Or we'll be conquered by someone else.

Our irrigation is too vast,
I don't think it is going to last.

Our trade relations are all gone
I don't think we can last for long.

Prime movers bringing change.
